THE BIG ISLAND HAMGRAM

The newsletter of the Big Island Amateur Radio Club

Super Bowl preempts BIARC; regular meetings will be Feb. 15

Due to the Feb. 8 Super Bowl, BIARC's monthly meetings at Kamana Senior Center will be at noon (Executive Board) and 2 p.m. (membership) on Sunday, Feb. 15. BIARC Secretary Jim Tatar, WH6EMN, also reports Kamana coordinators need to do some room changes to accommodate class schedules.

"We will have our February directors and general meeting in room AB, which is next to where we are now," said Jim.

"In March we will need to meet in the small room next to the office and then move to AB after that for the general meeting.

"Starting in April we will be in room AB for all meetings and the meeting times will remain at 12 noon for the directors meeting and 2 p.m. for the general meeting."

NEW BIARC BOARD — Following the first executive board meeting of the new year, the 2026 leadership team takes time out for a photo. From left: Jim Tatar, WH6EMN, secretary; David Miller, KH6CZ, vice president; Fred Fischer, WH6HAA, treasurer; directors Shawn Farley, WH6GXZ, and Bernie Walp, WB6PIO; William Polhemus, NH6ET, our FCC station trustee; and Thomas Avila, KH6GG, president.

Gary Miller, KH6GM, and Bob Schneider, AH6J, at South Point Amateur Radio Club Winter Field Day next to Whittington Beach Park in Ka'u on Jan. 24.

A Winter Field Day like no other!

By Bob Schneider, AH6J

Winter Field Day (WFD, held on the last weekend in January) is an operating event similar to the ARRL Field Day held on the fourth weekend in June.

Rules are similar except the class "O" is reserved for "Outside" stations. We were reporting "30 PAC".

On the mainland cold weather can be a negative factor.

In Hawaii cold weather is not a problem even though our highest mountain, Mauna

Kea, did have snow.

The South Point Amateur Radio Club, (aka, SPARC) is the southern most Amateur Radio Club in the United States. They sponsored the event setup and operation. Their base-camp was close to Whittington Beach Park. The nearest town is Naalehu.

It is a significant drive from just about any place on Hawaii Island aka "The Big Island." Hawaii Island has a total land area of about 4,000 square miles.

Continued on next page

What's more important than grounding your QTH? Answer: Doing it the RIGHT way

At the January meeting, the membership was treated to a wide-ranging discussion on the latest developments within the "open source community" responsible for breakthroughs in technology and equipment.

Shawn Farley, WH6GXZ, focused on his efforts on behalf of the Hawaii Meshtastic network, and encouraged others to get involved.

Anyone with a Raspberry Pi can join in and help. MeshForge is a big part of the process.

President Thomas Avila focused on the world of Linux and the experimenting and fun he's having in that arena.

William Polhemus, NH6ET, gave a hana hou presentation of his popular talk on "Grounding, Part 1."

With interaction from some of the members present, William went step-by-step through this complex and vital subject area, repeatedly stressing his personal mantra:

"Don't meet code; exceed code."

Down to Earth!

Information about grounding your amateur radio station, from the ground up.

Presented by:

William Polhemus – BIARC

Why should you ground your station?

1. Safety.
 - Grounding and bonding protects you, your family, your home, and your equipment.
2. Performance.
 - Grounding and bonding can reduce noise, reduce spurious emissions, prevent many types of equipment malfunction, and even increase receiver performance.

Remember

Electricity will kill you!

A Winter Field Day like no other!

From previous page

At 10:30 AM HST Gary Miller, KH6GM, called and asked if I wanted to go to Field Day if he drove. I said yes and he agreed to pick me up at Noon. He was driving his Tesla, an electric truck with a stainless steel body and Full Self Driving if selected. It is very nice!

Meanwhile, Kilauea Volcano had been building pressure toward its "Episode 41" eruption cycle. Hawaii Volcanoes National Park (HVNP) is about 30 miles south of Hilo. Gary's home is about 20 miles north of Hilo and I am located in Keaau, 7 miles south of Hilo.

The volcano started its vigorous fountain eruption at 11:10 AM and by 11:30 AM the lava fountains were somewhere around 1,600 feet, (500 meters) but there was almost no wind.

Gary arrived in Keaau at 12 noon and drove south. As we arrived at the village of Volcano, a little after 12:30, they closed the road (HWY 11) behind us and we were committed to continuing south.

We decided to drive into HVNP to get pictures and see the eruption. It was very crowded and "Tephra" (rocks) were falling from the sky and hitting us.

Shortly after we got into the Park, they actually closed it due to the large quantities of Tephra and ash falling near the eruption.

The rangers opened the rear gate and allowed us to exit directly on HWY 11, but we could only turn south. Because there was little wind the rocks fell straight back down, eventually covering the surrounding area.

Tephra is light and the fallout area was several miles around the volcano. There was also a lot of "Pele's Hair", (strands of glass like lava).

We "finally" arrived at the gate entrance to the WFD site only to discover police cars, fire trucks and emergency vehicles. It turns out they were looking for a lost spear fisherman. (Unfortunately, later that evening they did find his body.)

Earlier that morning the Hawaii County Civil Defense (HCCD) director, Talmadge Magno, visited the site to see the activities. During FD that visit means extra points.

Radio propagation conditions were great on 10M from the start. Contacts were made on 10M, 15M, 20M and 40M. The crew did a won-

Tephra that fell from the eruption.

Rick Ward, WH6FC, SPARC president.

Photos by Gary Miller, KH6GM, Bob Schneider, AH6J, and USGS at HVNP

The third member of the intrepid team from the East Side, KH6GM's stainless steel, electric Tesla truck.

Lava fountain and lava pool

A Winter Field Day like no other!

Fallout from the eruption covers ground at entrance to Hawaii Volcanoes National Park.

From previous page

On the way home ...

derful job of setting everything up and were "on the air" by 8:00 A.M.

WF1A, Vojin Oklogdzija, operated the CW tent and the main area had SSB and the food. They operated "30 PAC" even though the third transmitter was not very active.

They used Rick Ward's call WH6FC. Rick reported they made 2620 points or 42% of their goal operating for only half the contest. Operations were stopped at 8:00 P.M. And all the participants left the area by 11:30 P.M. Because we are in Hawaii, many of the phone contacts ended with "Aloha" as the final sign off.

As for Gary and me, later in the afternoon we got a message from HCCD that Highway 11 would be reopened about 6 PM. We ended up following the road cleaning (sweeping and washing) trucks part of the way back.

Fortunately, the Tesla was able to self-drive us most of the 160-mile round trip through the Tephra falling and in the wake of the road washing trucks, making the experience more relaxing for us to catch up on our event-filled day.

It was a Field Day we will never forget!

Crews on tanker trucks wash debris from roads.

View of the lava fountains estimated at 1,600 feet (as shown on local TV news).

Jeremy Punsalan, KH7CN, has won the World Wide Award All Bands Mixed-Hawaii-Bronze hunter award.

BIARC Minutes of General Meeting 1/10/2026

General Membership Meeting convened at 2:09 PM
 Directors Present: Thomas Avila, President; David Miller, Vice President; Fred Fischer, Treasurer; James Tatar, Secretary, Trustee William Polhemus; Shawn Farley, Director; Bernie Walp Director.

The new board was introduced to the members, and the positions of the various directors announced:

Thomas Avila: President
 David Miller: Vice President
 Fred Fischer: Treasurer
 James Tatar: Secretary
 William Polhemus: Trustee
 Shawn Farley: Director
 Bernie Walp: Director

Members introduced themselves. A discussion and comprehensive information on Grounding was given by William Polhemus. We have 2 members who are now silent key, Glenn and Marvin.

Meeting adjourned.

James Tatar, secretary

Operate W1AW/KH6 in mid March

ARRL is granting each state two runs at being W1AW.

In our case: W1AW/KH6.

This is to help activate all 50 states for the special WAS250 certificate.

<https://www.arrl.org/america250-was>

This has already begun with New York and Nebraska leading off during the first week of this year as W1AW/2 and W1AW/0. Each week starts Wednesday at 0000Z and ends the next Wednesday.

See the whole list here:

<https://tinyurl.com/4vzbmn4c>

Our weeks for activating W1AW/KH6 are March 18-24 and Aug 19-25. For Guam, the weeks are March 11-17 and Dec 9-15.

This is a fun event and is open to all hams regardless of license level.

However, be sure to stay within your FCC frequency and mode allocations for your license. It can be on any non-WARC band and any mode (CW, Phone, Digital).

We need your help to get W1AW/KH6 active as much as possible on all modes during our two weeks.

First up is March 18-24. I have set up an operating schedule with two-hour shifts. You can see the spreadsheet here: <https://tinyurl.com/3urw3pm9>

To sign up, you need to contact your island coordinator or me.

Kauai: Bill, W2DK email: secretary at kauai-arc.org

Oahu: Kimo, KH7U email: kimochun at gmail.com

Maui: Alan AD6E email: ad6e at arrl.net

Hawaii: Lloyd KH6LC email: kh6lc at hot-mail.com

Guam: Tim KH2XX email: eodkaboom at hotmail.com

Send an email to your coordinator requesting a specific date, time, band, and mode. They will add you to the operating schedule. You operate W1AW/KH6 mid March, and may request as many operating slots as you want.

Please read the operating guidelines.

https://drive.google.com/file/d/1X_CVDbkGfu19yVdeGHoeubapnEpGikJ/view?usp=sharing

You need to log all contacts with a computer that can provide a log in ADIF and send it to me after the event.

Bottom line: Have fun!

Aloha, Alan AD6E / KH6TU

Please contact me with questions at ad6e@arrl.net and NOT arrl.org

ARRL Pacific Section

Section Manager: Alan P Maenchen, AD6E ad6e@arrl.org

Youth on the Air Camp general app

Young amateur radio operators across the Americas are encouraged to apply for the sixth Youth on the Air Camp at YouthOnTheAir.org. The camp is scheduled to take place June 14 - 19, 2026, in Huntsville, Alabama, and will have a "space" theme. In addition to meeting other young hams, campers will participate in a variety of radio activities including kit builds, contesting, and satellite operating. Licensed amateur radio operators ages 15 - 25 can apply. A priority application period is open now, ending on January

15, with spaces being held for youth from various areas of North, Central, and South America. General applications will continue to be accepted until May 1. Up to 50 campers will be accepted. The Huntsville Amateur Radio Club, an ARRL Affiliated Club, is the local host for the 2026 camp. For additional information, please contact Camp Director Neil Rapp, WB9VPG, at director@youthontheair.org.

The Hawaii County Siren Report for February 2026

From Darrell Asuka, KH6RDO, for the Big Island ARES Group

Notes:

Enclosed is the February siren report. We had several new locations being reported. Allstar system was partially out along Hamakua today.

BIARC

Education & Outreach Committee Report – February 4, 2026

Activity

Jan. 1 – Siren Test Net participation.

Jan.11 – BIARC Exec and Member meetings.

*WH6EMN, KH6CZ
and WH6HAA at
Kaumana
Elementary
Science Night on
Feb. 4.*

Jan. 24 – The Pacific International Space Center for Exploration Systems (PISCES), the Canada-France-Hawaii Telescope, and the Hawai'i Science and Technology Museum hosted BIARC participation in the Astronaut Ellison Onizuka Science Day at UHH. Leigh (WH6LC) was off site handling RF communications with the students while Fred (WH6HAA), Jim (WH6EMN), Luke (WH6GRW), and David (KH6CZ) were on site at the campus and on the air. An informative and enjoyable event.

Jan. 28 – Participation - VOAD Zoom meeting - Communications Working Group.

Scheduled

Feb. 4 - Kaumana Elementary School Science Night 5:00-6:30 PM.

Feb. 15 – BIARC Exec and Member meetings.

Planned

1. Hilo Union Elementary - Wednesday, March 4 5:00-7:00 PM
 2. Hilo Intermediate - Thursday, April 16 5:00-6:30 PM
 3. Keonepoko Elementary - Wednesday, May 13 4:30-6:00 PM
- Further educational elements re ham radio via Video Presentation
 - Further refine the Photo Release for Minors at BIARC E&OC supported events.
 - Continue to work with the Museum of Science and Technology agenda (see above) through 2026 and solicit participation at Emergency Prep and Readiness events in Puna.
 - Integrate the BIARC PC material and enrich EOC presentations.

BIARC E&OC Committee

Leigh Critchlow WH6LC, Fred Fischer WH6HAA, Jim Tatar WH6EMN, Mark Watanabe WH6FSA, Les Hittner K0BAD. Thanks to all members.

David Miller - BIARC Education and Outreach Committee

ARRL Awards Colvin Grant to Bouvet DXpedition

ARRL has awarded a \$5,000 Colvin Award grant to the Delta-Xray Group, organizers of the upcoming [3YØK DXpedition to Bouvet Island](#), scheduled for February and March, 2026. Bouvet is a remote island in the Southern Ocean, populated only by seals and penguins, and known for treacherous weather and surf conditions. It is a territory of Norway and nearly all of it is covered by glaciers. The most recent amateur radio operation from Bouvet was the 3YØJ DXpedition in 2023, which moved the island from #2 on the Club Log most wanted list to #10.

Two camps are planned, according to team leaders, operating all HF bands, with one camp focusing on high band propagation to North America when conditions allow. Each camp will consist of three tents serving as operating, sleeping, and communal spaces. These tents have previously been used on Bouvet Island and team leaders say they have proven capable of withstanding the extreme conditions expected.

Plans call for the team to leave for Bouvet from Cape Town, South Africa, on February 1. Weather permitting, 3YØK plans to use helicopter airlifts to transport personnel and equipment between the vessel and the island. The group expects to spend three weeks on and around the island and will attempt to contact as many other ham radio operators around the world as they can, using up to 8 stations operating on CW, SSB, FT8, RTTY and the QO-100 geostationary satellite.

Most of Bouvet Island is covered by glaciers and there are very few hospitable landing spots. Plans call for 3YØK operators and equipment to be taken ashore by helicopter. [Photo courtesy of 3YØK DXpedition group]

The 3YØK DXpedition is perhaps the most expensive ham radio expedition ever mounted, with a budget of \$1.7 million, most of which (\$1.2 million) is for what the team refers to as a “reliable commercial Arctic / Antarctic vessel,” noting that “(s)afe and reliable ship transportation continues to be a challenge for such remote island expeditions, and the cost continues to rise.” Team leaders note that “the foremost priority of the 3YØK expedition is the safety of the operating team, support personnel, and the vessel and helicopter crews.”

QST, QST: Bouvet Island calling

The [3YØK DXpedition to Bouvet Island](#) is scheduled for February and March, 2026.

Bouvet is a remote island in the Southern Ocean, populated only by seals and penguins, and known for treacherous weather and surf conditions. It is a territory of Norway and nearly all of it is covered by glaciers.

Plans call for the team to leave for Bouvet from Cape Town, South Africa, on February 1. Weather permitting, 3YØK plans to use helicopter airlifts to transport personnel and equipment between the vessel and the island. The group expects to spend three weeks on and around the island and will attempt to contact as many other ham radio operators around the world as they can, using up to 8 stations operating on CW, SSB, FT8, RTTY and the QO-100 geostationary satellite.

The team consists of 24 operators from 14 countries. Two of the team members are young hams, 21-year-old Max Freedman, N4ML, an ARRL staff member; and 26-year-old Alex Schengber, DL2ALY, an aviation engineer currently working at a German research station in Antarctica.

The Colvin Award is funded by an endowment established by the legendary DX couple Lloyd Colvin, W6KG (SK), and Iris Colvin, W6QL (SK), both now deceased. The award is intended to support amateur radio projects that promote international goodwill in the field of DX.

Other major financial support for the DXpedition has come from the Northern California DX Foundation, the International DX Association, and the German DX Foundation.

The complete 3YØK log will be uploaded to ARRL's [Logbook of The World](#)® — LoTW® — within 12 months following the DXpedition. LoTW is used by radio amateurs to track their progress toward awards including ARRL's [DXCC Award](#) — the DX Century Club Award — which is achieved by confirming on the air contacts with 100 geographic entities.

“We extend our sincere thanks to all equipment sponsors and financial supporters, and particularly the ARRL Colvin Award grant. Without this collective support, activating Bouvet Island and delivering an ATNO (All-Time New One) from the #10 Club Log DXCC most wanted entity would not be possible.” The team continues to seek financial support from the amateur radio community.

For more information, visit [3y0k.com](#).

Announcements

The **Northern Arizona DX Association (NADXA)** has announced the dates for 6th annual Pluto Discovery Anniversary special event, February 14 - 22, 2026.

Using the call sign W7P, operations will be based at Lowell Observatory in Flagstaff, Arizona, set up in front of the new Marley Astronomy Discovery Center. Stations will be active daily, as time and band conditions permit. This event commemorates the discovery of Pluto by Clyde Tombaugh at the Lowell Observatory in 1930. Operations will take place in a communications trailer with upgraded equipment. An ARRL grant was used to heat the trailer and it can now run on solar power with 100-amp hour batteries. With over 100 inches of snowfall each year, NADXA members will also be operating from their home stations and from out-of-state locations to keep the event on the air. Tombaugh's nephew, Doug Tombaugh, N3PDT, and his team will be operating as W7P/Ø. Suggested frequencies are 14.266, 21.366, 28.366, and 7.266 MHz. A certificate and QSL card will be available.

ARRL to host 9th annual Ham Radio Science Citizen Investigation Workshop

ARRL will host the 9th annual Ham Radio Science Citizen Investigation (HamSCI) Workshop on March 14 – 15, 2026, with primary activities held at Central Connecticut State University (CCSU) in New Britain, Connecticut, and additional events at ARRL Headquarters in Newington. The international workshop brings together radio amateurs, scientists, educators, and students to explore how amateur radio serves as a practical tool for scientific research and citizen science.

Organized by the HamSCI community, the 2026 workshop carries the theme “Discovering Science Through Ham Radio.” Presentations and discussions will highlight real-world research enabled by amateur radio, including ionospheric and space weather studies, meteor scatter propagation, radio-based sensing technologies, and the growing use of Personal Space Weather Stations. The program emphasizes how these efforts not only advance scientific understanding, but also directly inform and improve amateur radio operating and technology.

Attendees at HamSCI 2025 hosted at the New Jersey Institute of Technology. [Bob Inderbitzen, NQ1R, photo]

Communicating with Other Hams

Contact Basics: Good Amateur Practices

Q-Signals

Q-signals are a system of radio shorthand as old as wireless and developed from even older telegraphy codes. Q-signals are a set of abbreviations for common information that save time and allow communication between operators who don't speak a common language. Modern ham radio uses them extensively. The table below lists the most common Q-signals used by hams. While Q-signals were developed for use by Morse operators, their use is common on phone, as well. You will often hear, "QRZed?" as someone asks "Who is calling me?" or "I'm getting a little QRM" from an operator receiving some interference or "Let's QSY to 146.55" as two operators change from a repeater frequency to a nearby simplex communications frequency.

Q-Signals	
Abbr.	Questions
QRG	Your exact frequency (or that of _____) is _____ kHz. Will you tell me my exact frequency (or that of _____)?
QRL	I am busy (or I am busy with _____). Are you busy? Usually used to see if a frequency is busy.
QRM	Your transmission is being interfered with _____ (1. Nil; 2. Slightly; 3. Moderately; 4. Severely; 5. Extremely.) Is my transmission being interfered with?
QRN	I am troubled by static _____. (1 to 5 as under QRM.) Are you troubled by static?
QRO	Increase power. Shall I increase power?
QRP	Decrease power. Shall I decrease power?
QRQ	Send faster (_____ wpm). Shall I send faster?
QRS	Send more slowly (_____ wpm). Shall I send more slowly?
QRT	Stop sending. Shall I stop sending?
QRU	I have nothing for you. Have you anything for me?
QRV	I am ready. Are you ready?
QRX	I will call you again at _____ hours (on _____ kHz). When will you call me again? Minutes are usually implied rather than hours.
QRZ	You are being called by _____ (on _____ kHz). Who is calling me?
QSB	Your signals are fading. Are my signals fading?
QSK	I can hear you between signals; break in on my transmission. Can you hear me between your signals and if so can I break in on your transmission?
QSL	I am acknowledging receipt. Can you acknowledge receipt (of a message or transmission)?
QSO	I can communicate with _____ direct (or relay through _____). Can you communicate with _____ direct or by relay?
QSP	I will relay to _____. Will you relay to _____?
QST	General call preceding a message addressed to all amateurs and ARRL members. This is in effect "CQ ARRL."
QSX	I am listening to _____ on _____ kHz. Will you listen to _____ on _____ kHz?
QSY	Change to transmission on another frequency (or on _____ kHz). Shall I change to transmission on another frequency (or on _____ kHz)?
QTC	I have _____ messages for you (or for _____). How many messages have you to send?
QTH	My location is _____. What is your location?
QTR	The time is _____. What is the correct time?

ITU Phonetic Alphabet

Letter	Word	Pronunciation
A	Alfa	AL FAH
B	Bravo	BRAH VOH
C	Charlie	CHAR LEE
D	Delta	DELL TAH
E	Echo	ECK OH
F	Foxtrot	FOKS TROT
G	Golf	GOLF
H	Hotel	HOH TELL
I	India	IN DEE AH
J	Juliet	JEW LEE ETT
K	Kilo	KEY LOH
L	Lima	LEE MAH
M	Mike	MIKE
N	November	NO VEM BER
O	Oscar	OSS CAH
P	Papa	PAH PAH
Q	Quebec	KEH BECK
R	Romeo	ROW ME OH
S	Sierra	SEE AIR RAH
T	Tango	TANG GO
U	Uniform	YOU NEE FORM
V	Victor	VIK TAH
W	Whiskey	WISS KEY
X	X-Ray	ECKS RAY
Y	Yankee	YANG KEY
Z	Zulu	ZOO LOO

Note: The **boldfaced** syllables are emphasized. The pronunciations shown in this table were designed for those who speak any of the international languages. The pronunciations given for "Oscar" and "Victor" may seem awkward to English-speaking people in the US.
